It is typically rendered graphically as a plot, and the data observed from each side of a spiral galaxy are generally asymmetric, so that data from each side are averaged to create the curve. Dark matter halo - Wikipedia According to modern models of physical cosmology, a dark matter halo is a basic unit of cosmological structure. It is a region that has decoupled from cosmic expansion and contains gravitationally bound matter. A single dark matter halo may contain multiple virialized clumps of dark matter bound together by gravity, known as subhalos. Modern cosmological models, such as Λ CDM, propose that dark ...
