ELECTRIC DRIVES - ttu.ee 4. ELECTRIC DRIVES 4.1 General description Electric drive is an electromechanical system (mechatronic system) intended to set into motion technological equipment. It consists of an electric motor (motors), a transfer mechanism, an electrical energy converter, and a control system. The control system consists of a microcontroller with data connection interfaces, data channels (data network ... Stabilization of Chaos in Electric Vehicle Steering ... drive system as shown in Fig. 3, components in AC motor drives can be expressed in a stator fixed d-q reference frame. The two orthogonal components on d - and q -axis can be used
