With regard to the response of HPFRCCs in compression, WBDG | WBDG - Whole Building Design Guide The Gateway to Up-To-Date Information on Integrated 'Whole Building' Design Techniques and Technologies. The goal of 'Whole Building' Design is to create a successful high-performance building by applying an integrated design and team approach to the project during the planning and programming phases. Research and practice on progressive collapse and ... An interesting matter of discussion is the difference between progressive and disproportionate collapse. Progressive collapse is a collapse that begins with localised damage to a single or a few structural components and develops throughout the structural system, affecting other components. Effect of grout properties on shear strength of column ... Concrete grout is used in most column base connections to facilitate the construction process and to ensure that full contact is achieved between the steel plate and the concrete pedestal. Department of Civil Engineering Computer use is an integral part of the Civil Engineering curriculum. From required courses in computer programming and numerical analysis to subsequent use and development of Civil Engineering programs, students experience the use of computers as a planning, analysis, design, and managerial tools.
