The goal of this series is to explore the intersection of three historically distinct areas of learning research: computational learning theory, neural networks and AI machine learning. Although each field has its own conferences, journals, language, research, results, and directions, there is a growing intersection and effort to bring these fields into closer coordination. Computational Learning Theory — Artificial Intelligence ... In computer science, computational learning theory (or just learning theory) is a subfield of Artificial Intelligence devoted to studying the design and analysis of machine learning algorithms. Computational Learning Theory quiz as discussed by two Georgia Tech machine learning researchers.
