The book is designed for researchers, students and practitioners interested in using fast and efficient iterative methods to approximate solutions of nonlinear equations. The following four major problems are addressed. Problem 1: Show that the iterates are well defined. Problem 2: concerns the convergence of the sequences generated by a process and the question of whether the limit points are, in fact solutions of the equation. Problem 3: concerns the economy of the entire operations ... Computational Theory of Iterative Methods: Volume 15 ... Computational Theory of Iterative Methods: Volume 15 by Ioannis K. Argyros, 9780444531629, available at Book Depository with free delivery worldwide. A Computational Test for Convergence of Iterative Methods ... A simple computational test for existence of a solution to a nonlinear system of equations and convergence of iterative methods is given for n -cubes. The test is eventually satisfied by any convergent Newton-type sequence. In this paper we consider the local rates of convergence of Newton-iterative methods for the solution of systems of nonlinear equations. We show that under certain conditions on the inner, linear i... International Journal of Computational Methods | Vol 15, No 03 pdf Preview Abstract The problem formulations of models for three-dimensional weakly nonlinear shallow water waves regime in a stratified shear flow with a free surface are studied.
