The process consists of three stages, namely jet initiation, elongation, and solidification into a nanofiber. The working principle behind electrospinning is the electrostatic charging of a droplet of polymer solution held at the tip of a fine capillary overcoming the surface tension holding the droplet. INTRODUCTION - Therese Zumi Sumner And, this has been saved for the time when the final push had need to come. All of us – there is not a single being of what you think of as the Company of Heaven, the Council of Love, all the councils, the Intergalactic Council – we have all been asked to send the full force of our loving energy, our creative force, to each of you. anneliese garrison - YouTube Subscribe to my channel so that you can be part of the "Community Tab" and access more helpful information.
