Introduction to TensorFlow - tensorchiefs.github.io Abstract Introduction to TensorFlow TensorFlow is a mul/purpose open source software library for numerical computation using data flow graphs. It has been designed with deep learning in mind tensorflow - Declaring and Initializing Variable Tensors ... Example. Variable tensors are used when the values require updating within a session. It is the type of tensor that would be used for the weights matrix when creating neural networks, since these values will be updated as the model is being trained.
